Clean Energy, Clear Vision

Atmos Renewables is powering a sustainable future for Australia. We are driving the energy transition through developing, operating and responsibly investing in clean energy for the long term. We are committed to achieving positive environmental outcomes and lasting relationships with local communities.

We work together with Integrity, Safety, Courage & Humility

The Company

Atmos Renewables is a leading Australian renewable energy IPP with interests and ownership in over 1.7GW of wind and solar assets across all the NEM states. Established in 2020 by Igneo Infrastructure Partners, a specialist global investment management company with over 25 years' experience in infrastructure, Atmos develops and invests in renewable energy projects at all stages of their lifecycle and is a long-term owner and operator of clean generation and storage assets.

Atmos will be part of the solution to decarbonising Australia's electricity network by building and operating a portfolio of renewable energy generation assets while being the partner of choice for communities, landowners and offtakers across Australia.

Atmos is managed by a growing, highly experienced team of renewable energy professionals, with offices in Sydney and Melbourne, Australia. We are committed to investing in clean technology that offsets carbon emissions in the Australian electricity markets and in a way that supports Australia's vibrant local communities and protects and enhances its biodiversity. Atmos is building a development pipeline of projects at various stages and expects to have projects in construction within two years.

About Us

We are a small, dynamic and highly motivated team that works very closely together, and we want you to succeed with us.

Our people are our most valuable asset, and we show this through the benefits we offer including competitive remuneration, competitive bonus and flexible working. We are also dedicated to the personal and professional development of our employees via training and development opportunities.

Atmos has day-to-day management responsibility of all the 100%-owned assets in the portfolio of over 750MW and oversight of our joint-venture projects. Atmos is building development pipeline of wind, solar and battery assets to add to our gigawatt operational portfolio.

The Role

An exciting opportunity to be part of the growing Asset Management Team responsible for the day-to-day management of the operational wind, solar and BESS projects in our portfolio.

Reporting to the **Head of Asset Management**, the **Asset Manager** is responsible for the performance and success of the assets allocated to them.

The ideal candidate will be degree qualified and/or have relevant experience managing Operation & Maintenance agreements for renewable energy assets – wind, solar or BESS. Relevant experience on other energy generation or operational infrastructure assets will also be considered. A robust understanding of the principles of asset management and details for how technical and commercial decisions impact asset lifecycle performance is highly desirable.

Experience in managing complex service agreements to delivery safe operations and high asset performance, including management of any commercial issues that may arise is highly desirable.

Strong stakeholder management skills are required for a range of internal and external stakeholders, including landholders, community members, regulators and suppliers.

The role would suit a self-motivated individual with experience managing the requirements within the energy and utilities industry who can support Atmos Renewables' goals and ambitions.

Key responsibilities:

- Responsible for asset WHS compliance.
- Responsible for delivery of the allocated asset P&L and related KPIs.
- Responsible to deliver allocated asset performance targets through the management of the asset budgets and contracts.
- Responsible for the asset reporting related to WHS, performance, commercial, market interactions and compliance to internal and external stakeholders, with support from the rest of Operations.
- Responsible for the communications and interactions with allocated assets external stakeholders, including suppliers, community members, regulatory bodies and build long-term sustainable relationships.
- Responsible for the coaching and development of Associate Asset Managers with which they are working.
- Support the tendering, negotiation and review of any equipment warranties and service agreements as renewals fall due.
- Management of allocated asset documentation as required by Atmos' internal systems and external requirements.
- Demonstrate strong Health, Safety and Environment values, ensuring all O&M contractor services are performed to the highest HSE standards and in accordance with all applicable legislation and regulations.
- Manage complex technical issues, including sound knowledge of root cause analysis techniques.
- Daily analysis of asset performance, liaising with O&M contractors to prioritise and address any issues.

- Deliver reporting of asset performance to internal and external stakeholders.
- Analyse and interpret operational data to provide insights and identify issues, performance improvements and asset reporting.
- Interrogate and independently calculate and verify contractor reports, including availability guarantees and contractual KPIs.
- Management of any equipment warranties in accordance with warranty agreements and processes
- Liaise with various finance, legal and technical internal stakeholders to deliver asset outcomes.
- Manage asset performance to ensure optimum and continuous compliant operations in accordance with the NER.
- Manage statutory and compliance management for technical matters on the operational plants, including liaising with internal and external stakeholders.

Skills & Experience

- Recognised qualifications in engineering, business, commercial or other relevant equivalent experience.
- 3+ years of relevant professional experience in the renewable energy sector. Relevant experience gained in other sectors will be considered.
- Experience in managing complex services agreements for operating assets.
- Experience in analysis and audit of Health, Safety and Environment matters
- Knowledge of asset life maintenance planning, whilst understanding importance of balancing reliability-based maintenance with maintenance cost management
- Sound knowledge and understanding of Australian electricity regulations and requirements, including NER compliance.
- Willingness to travel domestically (including regional areas)
- Highly developed communication skills, with the ability to translate complex technical matters to various stakeholders.
- Experience in the technical operation of renewable energy assets is highly desirable – including utility solar PV inverters, wind turbines, SCADA systems, HV AC and DC reticulation and power transformers.
- Excellent written and oral communication and collaboration skills.
- Understanding of related industry standards and best practices frameworks.
- Ability to succeed in a fast-paced, entrepreneurial office environment.
- Self-motivated with a high level of initiative and accountability.
- Organized, diligent, and able to track and manage multiple streams of information on an ongoing basis.
- Able to work under pressure and meet deadlines.
